WU Vienna, D4, room 2.144. Office hours by appointment.

Course Description:

This course introduces students to the relevance of gender relations in economics as a discipline and in economic processes and outcomes. The course covers three main components of gender in economics and the economy: (1) the gendered nature of the construction and reproduction of economic theory and thought; (2) the relevance and role of gender in economic decision-making; and (3) differences in economic outcomes based on gender. We will touch on the relevance of gender and gender relations in at least each of the following topics: economic theory; the history of economic thought; human capital accumulation; labor market discrimination; macroeconomic policy, including gender budgeting; household economics; basic econometrics; economic history; and economic crises.

Class meetings will consist of lectures by the instructor, short readings, videos, class discussion, and group work.

Goals of the course:

This course provides a thorough overview of the state of research and central issues in economic analyses of gender and feminist economics. The students will develop an understanding of the basic relationships between economics and gender relations, and the (re)production of these relationships. Students are encouraged to think independently about how gender works and matters in economic processes and outcomes.

Required Texts:

Most of the readings for the class are academic journal articles available online or book chapters provided by the instructor. In addition, students will be required to read the novel *Homegoing* by Yaa Gyasi; purchasing a copy may be convenient.

Course requirements:

- **Attendance, participation, “show and tell”**
 - Attendance and participation are an important part of the course. Participation points will be distributed immediately following class and updated online.
 - Students are responsible for all course material, even if they have missed a class.
 - Twice in the semester, students should briefly and informally share with the class something that they have come across that is relevant for the class. This can be a song, a newspaper article, a viral tweet, a political campaign, a video... really, whatever has caught your attention. The main idea is that you explain how this

thing is connected to concepts and ideas we are discussing in the course and how you understand this thing differently now that you are taking the course.

- **Reflection paper**

- Choose two people in your family: one male and one female (if there is a non-binary identifying person in your family, you can certainly choose them, too). Explain their economic conditions: are they relatively poor? wealthy? in the labor market? a precariously employed worker? ...and so on. Next, reflect on the core social, economic, historical, and political circumstances that have influenced their economic reality. Draw on the theories and readings from the class to help explain the factors that have influenced each person's economic circumstances. Finally, comment on any differences you see by gender.
- This reflection paper should be about 8-10 pages long, double spaced, not including references.
- The paper should, of course, refer to and cite academic literature in the construction of the discussion. Use this opportunity to show me that you have read and understood the assigned readings. Papers which integrate more of the assigned readings will probably be more successful!

- **Final Essay**

- Students will write individual essays in which they reflect on their own university training so far. The essay should explain a core concept or model that the student has learned in another class. Then, the essay should extend, edit, and/or re-specify the concept or model to more adequately account for gender relations. Finally, the essay should explain how this improved edition of the model or theoretical concept better explains reality.
- There are no formal requirements regarding the length of this essay. Papers of differing lengths can be equally good! Remember to make each paragraph, each sentence, and each word contribute to your argument.
- The essay should, of course, include reference to academic literature. Use this opportunity to show me that you have read and understood the assigned readings. Papers which integrate more of the assigned readings will probably be more successful!

Point system:

Class participation	30
"Show and tell" (2)	5 each
Reflection paper	30
Final essay	30

Grading scale:

$\geq 88 \text{ points} = 1$ || $75\text{-}87 \text{ points} = 2$ || $60\text{-}74 \text{ points} = 3$ || $50\text{-}59 \text{ points} = 4$ || $< 50 \text{ points} = 5$

Schedule and reading assignments:

Date (2019)	Topic; Readings
9 October	<ul style="list-style-type: none"> • Introduction and overview of the course; course structure; expectations and requirements; goals • Gender in Economics (the discipline) • Lundberg, Shelly and Jenna Stearns (2019). “Women in Economics: Stalled Progress.” <i>Journal of Economic Perspectives</i> 33(1): 3-22.
